

Please do not overturn the State of Indiana's Do Not Call List. It is the most comprehensive in the nation and should be the model for all States. We worked very hard to get this legislation because we were constantly bothered by calls at supper time and bed time by telemarketers who constantly bothered us for products or services we had no interest in. When we are in our private homes we should have the right to peace and quiet and not be bothered by unwelcome phone calls which are very annoying. The last few years with the no call list have been a blessing. Please do not overturn our law.

Thank you.

Clayton and Linda Fleming
